Got this at a bargain 50% off, use this 101, on every QD route as well, the intended DLC. So I've got a bargain in my view.. A nice little DMU. Not very powerful, but with that gear control (which is rarely featured in official locos) driving the train was enjoyable to me. I also didn't notice any bugs lowering the overall experience.. This is a nice little pack - sure it may not be much if you already have the British Rail 101, but it does come with a nice set of fun and engaging scenarios. Not to mention that for just u00a34.99, it really brings the Glasgow Area to life on the West Coast Main Line North Route. So. yeah, that's pretty much it. If you have WCML North, give this a try. I feel you'll be pleasantly surprised.. I am very happy with this, for u00a34.99 i got this and another class 101 from a seperate dlc included. Cant beat a 101 for \$3.59 LoL
